(Aug '25- Apr '26)

PROJECTS

specZone - Ecommerce platform for spectacles

Aug 2023 - Nov 2023

- Built **specZone**, a responsive spectacles e-commerce website using PHP and MySQL. The platform features dynamic product listings and advanced filtering options to enhance the user experience. An efficient admin dashboard was also developed to manage products, orders, and overall website content smoothly. [Github](#)

ShuttleScore – Android Badminton Tournament App

Jan 2024 - Jun 2024

- Developed an **ShuttleScore** Android application for badminton tournaments with features such as live score updates, team registration, and OTP-based user authentication. The app integrates Firebase Realtime Database and Firebase Authentication for real-time data synchronization and secure login. It provides a smooth and reliable experience for managing tournaments and tracking match progress. [Github](#)

iVidhyarthi – Educational Management System

Jul 2025 - dec 2025

- Developed **iVidhyarthi**, a role-based educational management system designed to streamline academic operations. The system includes dedicated modules for Admin, Student, Lecturer, and Registrar roles, ensuring structured access and efficient workflow management. It enhances data handling, communication, and overall academic process management. [Github](#)
